LC SYSTEM SOLUTION
Greater Durability for Longer Life

The *Preferred Solution*
for Today's Demanding *Fiber Optic Networks*

D

C

E

F

B

A

G

A. Rear Pivot Latch
B. Longer Latch Beam
C. Protective Cap
D. Superior Weld Strength
E. Wide "Positive Grip" Latch
F. Duplexing Clip
G. Integrated Panel Retention Clips

Quick, easy termination	Efficient anaerobic adhesive termination reduces installation time 50% compared to heat cured epoxy terminations
Snagless installation	Rear pivot latch **(A)** reduces potential snag area 80%
Superior latch cycle life	Longer latch beam **(B)** cycle life is 5 times the industry standard
Advanced ferrule end face protection	Load isolating, self-locking protective cap **(C)** protects against impact as well as contamination
Improved adapter reliability	Superior adapter weld strength **(D)** provides a more durable product under stress
Double connectivity density	Duplex LC adapters fit into simplex SC adapter panel openings

|	
Easier access, better control during matings and unmatings	Wide "positive grip" finger latch **(E)** surface area is 250% larger than front pivot latch designs
Quick channel identification and polarity changes	Duplexing clip **(F)** with integrated polarity markers field installs without tools or re-termination
Improved adapter mounting	Integrated panel retention clips **(G)** eliminate lost or damaged metal clips
Snagless MACs	Low profile latch allows efficient moves, adds and changes
Assured connector mating	Audible "click" signals complete latching
Single connector design	One body design is used for simplex and duplex patch cords, and for applications inside the wall

LC Fiber Optic Connectors

- FOCIS-10 TIA/EIA-568-B.3 compatible senior connectors
- Insertion loss: <0.10dB typical (multimode and singlemode)
- Return loss: >20dB (multimode), >40dB (singlemode)
- Fiber cable type: Tight-buffered recommended
- Fiber cable size: 1.6mm - 2.0mm jacketed cable (simplex and duplex) or 900µm buffered fiber (simplex only)
- Ferrule type: 1.25mm zirconia ceramic (highest durability for repeated matings)
- Non-optical disconnect maintains data transmission under tensile loads (jacketed cable only)

- Each simplex connector includes one connector body/ferrule assembly, one crimp sleeve, one boot for 900µm buffered fiber, one boot for 1.6mm - 2.0mm jacketed cable, and one dust cap
- Each duplex connector includes two connector body/ferrule assemblies, two crimp sleeves, two boots for 1.6mm - 2.0mm jacketed cable, two dust caps and one duplexing clip
- Field polish termination — *PANDUIT* recommends anaerobic adhesive
- Use LC Field Polish Termination Kit (FLPKIT)

FLCSSBU

FLCDMEI

Part Number	Part Description	Color	Std. Pkg. Qty.	Std. Ctn. Qty.
LC Simplex Fiber Optic Connectors				
FLCSMEI	LC multimode simplex fiber optic connector — 62.5/125µm or 50/125µm fiber.	Electric Ivory	1	10
FLCSSBU	LC singlemode simplex fiber optic connector.	Blue	1	10
LC Duplex Fiber Optic Connectors				
FLCDMEI	LC multimode duplex fiber optic connector — 62.5/125µm or 50/125µm fiber.	Electric Ivory	1	10
FLCDSBU	LC singlemode duplex fiber optic connector.	Blue	1	10

To comply with industry standards the connector housing and boots are blue for all singlemode connectors and electric ivory for all multimode connectors.

LC Fiber Optic Adapters

- FOCIS-10 TIA/EIA-568-B.3 compatible adapters
- Mini duplex adapter design fits into simplex SC adapter opening

- Choice of phosphor bronze or zirconia ceramic split sleeves to fit specific network requirements; zirconia ceramic split sleeves are required for singlemode applications
FADSLCEI-L

FASJLCZBU-L

Part Number	Part Description	Adapter Color	Std. Pkg. Qty.	Std. Ctn. Qty.
LC Sr./Sr. Fiber Optic Adapters				
FADSLCEI-L	LC Sr./Sr. mini duplex multimode fiber optic adapter with phosphor bronze split sleeves.	Electric Ivory	50	100
FADSLCZBU-L	LC Sr./Sr. mini duplex singlemode fiber optic adapter with zirconia ceramic split sleeves.	Blue	50	100
FASSLCZBU-L	LC Sr./Sr. simplex singlemode fiber optic adapter with zirconia ceramic split sleeve.	Blue	50	100
LC Sr./Jr. Fiber Optic Adapters				
FADJLCEI-L	LC Sr./Jr. mini duplex multimode fiber optic adapter with phosphor bronze split sleeves.	Electric Ivory	50	100
FADJLCZBU-L	LC Sr./Jr. mini duplex singlemode fiber optic adapter with zirconia ceramic split sleeves.	Blue	50	100
FASJLCZBU-L	LC Sr./Jr. simplex singlemode fiber optic adapter with zirconia ceramic split sleeve.	Blue	50	100

LC Sr./Sr. Fiber Optic Adapters have a FOCIS-10 <u>senior</u> adapter interface (without keyway) at each end. Both ends accept all FOCIS-10 compatible senior LC connectors (non-keyed; spring loaded ferrules). LC Sr./Sr. Adapters are typically used for patch panel and outlet applications, including behind the wall applications.
LC Sr./Jr. Fiber Optic Adapters have a FOCIS-10 <u>senior</u> adapter interface (without keyway) at one end, and a FOCIS-10 <u>junior</u> adapter interface (with keyway) at the other end. Both ends accept all FOCIS-10 compatible senior LC connectors (non-keyed; spring loaded ferrules). LC Sr./Jr. Fiber Optic Adapters provide greater flexibility because the junior end also accepts FOCIS-10 compatible junior LC connectors (keyed; fixed ferrule/springless). The shorter profile of the junior end accommodates tighter applications behind the wall, allowing easier access to FOCIS-10 compatible junior (shorter) LC connectors terminated on 900µm buffered fiber.

MINI-COM® LC Fiber Optic Adapter Modules

- FOCIS-10 TIA/EIA-568-B.3 compatible adapters
- Mini duplex adapter design fits into single module space
- Compatible with MINI-COM® products for complete modularity
- LC Sr./Sr. or Sr./Jr. Fiber Optic Adapters are provided to fit application requirements (refer to description on the bottom of page 3)

- Choice of phosphor bronze or zirconia ceramic split sleeves to fit specific network requirements; zirconia ceramic split sleeves are required for singlemode applications
- Commonly used with MINI-COM® Faceplates, Surface Mount Boxes and Patch Panels

CMDSLC

Quick, Easy Termination

LC Field Polish Fiber Optic Termination Kit

- For *PANDUIT* LC (1.25mm ferrule) field polish connector termination
- Fast acting adhesive
- Kit provides consumables for terminating up to 100 field polish connectors
- Includes non-consumable and consumable components
- Also includes stripping template for *PANDUIT* LC field polish connectors

FLPKIT

FST	Safety stickers for fiber scraps	1	10
FSYR-X	Syringes with needle tips	10	50
FWP-C	Cloth wipes	100	1000
PFX-0‡	Permanent Marking Pen, Fine Tip	12	144

^Not included in FLPKIT (may be ordered separately).
‡Only one piece included in FLPKIT.
LC Multimode Fiber Optic Patch Cords and Pigtails

- OPTI-CORE™ 10GIG™ 50/125µm patch cords support network transmission speeds up to 10 Gigabits per second for link lengths up to 300 meters with an 850nm source per IEEE 802.3ae 10GbE Standards
- Designed and tested to pass all TIA/EIA-568-B.3 performance requirements
- Insertion loss per connection: .10dB typical; .30dB maximum

- 100% factory tested for insertion loss
- Insertion loss data recorded for every multimode patch cord
- Lifetime traceability of test data to a Q.C. number on each patch cord
- Highest quality flame retardant fiber optic cable with tight-buffered coating on each optical fiber

## LC Singlemode Fiber Optic Patch Cords and Pigtails (OS1 Fiber)

- Passes all TIA/EIA-568-B.3 performance requirements
- 100% factory inspected end face geometry in compliance with Telcordia GR-326-CORE, Issue 3
- Typical insertion loss per connection: .25dB
- UPC polished (55dB minimum return loss)
- 100% factory tested and inspected for insertion loss and return loss

- Insertion loss and return loss data recorded for every singlemode patch cord
- Lifetime traceability of test data to a Q.C. number on each patch cord
- Highest quality flame retardant fiber optic cable with tight-buffered coating on each optical fiber
