WE CLEAN UP YOUR BOTTOM LINE™

About Spilfyter® by NPS Corp....

At Spilfyter® we are customer-focused, offer high-quality products, promote fair & honest dealings with our customers, suppliers, & employees all with a fast & flexible team-based culture.

Founded in 1996 in green bay, Wisconsin, Spilfyter® by NPS Corp is committed to providing high-quality products, responsive service & exceptional value. We utilize state-of-the-art meltblown & converting equipment & operate out of more than 300,000-square-feet (30.000 M2) of space to manufacture not only the best products in the industry, but also to ensure delivery of the products you need - when & where you need them. We sell our products globally to countries on 5 continents & have regional warehouses in the Netherlands & Singapore.

PRODUCT SELECTION GUIDE: CHOOSE THE PRODUCTS YOU NEED!

FEATURES & BENEFITS:

ARE YOU IN COMPLIANCE?...

- OSHA 1910.120(q)(3)(ii) - the individual in charge of the ics (incident control system) shall identify, to the extent possible, all hazardous substances or conditions present & shall address as appropriate site analysis, use of engineering controls, maximum exposure limits, hazardous substance handling procedures, & use of any new technologies.
- Classifier strips are used to identify what liquids have been spilled so that responders know how to treat the spill
- Identifies whether liquid is an acid/base/alkaline, oxidizer, fluoride, petroleum, organic solvent iodine, bromine or chlorine risk
- Aids responder in choosing proper steps in cleaning spills – such as type of sorbent needed or whether an acid or base/alkaline neutralizer needs to be used
- Laminated classifier charts determine possible presence of chemical types according to color changes in strip

FEATURES & BENEFITS:

- KOLOR-SAFE® color change process lets you know when acids are safe to handle - the color change occurs as the spill becomes pH neutral!. Many aggressive liquid spills involve hazardous acids that require a way to render them safe for final clean-up & disposal.
- Many aggressive liquid spills involve hazardous acids that require a way to render them safe for final clean-up & disposal in accordance with local, state & federal regulations.
- Dry formula is concentrated & thus has approximately 4 times the neutralizing capacity versus liquid neutralizers
- Liquid formula generates less gas & heat during neutralization than dry formula & can be sprayed onto uneven or vertical surfaces
- SEE ACID NEUTRALIZATION REFERENCE CHARTS ON PAGE 15

- KOLOR-SAFE® color change process lets you know when base/alkalines are safe to handle - the color change occurs as the spill becomes ph neutral!. Many aggressive liquid spills involve hazardous acids that require a way to render them safe for final clean-up & disposal.
- Liquid formula is ideal when spraying on vertical surfaces or applying in hard to reach areas such as tight corners
- Liquid formula generates less gas & heat during neutralization than dry formula
- Many aggressive liquid spills involve hazardous acids that require a way to render them safe for final clean-up & disposal in accordance with local, state & federal regulations.

FEATURES & BENEFITS:

- Designed to adsorb chemicals & other hazardous liquids
- Ideal for use in laboratories, hospitals & chemical storage areas
- One sided spunbond gives added strength; minimizes lint
- Rolls are perforated down center as well as across the width creating cost savings
- Rolls are static resistant giving greater safety when handling flammable liquids
- Use hazmat sorbent pads or rolls as liner material under lab equipment.

Use Hazmat Pads as under layer for lab equipment

FEATURES & BENEFITS:

SOCKS:

- Socks are designed to prevent flow as well as adsorb chemicals & other hazardous liquids
- Available in three different sizes for added flexibility
- Ideal for use with chemicals & other aggressive liquids
- Socks are flexible & can be shaped around leaky machinery or drums or odd shaped elements contained in a lab.

PILLOWS:

- Pillows are available in 3 sizes for added flexibility ideal for use with chemicals or other aggressive liquids.
- Pillows are ideal for soaking up larger spills concentrated to one specific area.

FEATURES & BENEFITS:

- These products are perfect for hospital, laboratory, research & cleanroom environments. Use low-lint sorbents in areas to keep them safe from spills & chemical over-runs.
- Low-lint pads & pillows are designed specifically with the lab or cleanroom environment in mind. Hazmat pads encased in standard tear resistant, low-lint spunbond.
- Use low-lint sorbents in areas to keep them safe from spills & chemical over-runs.
- Extra-low-lint cleanroom products are made with premium hazmat sorbents & are encased with a premium tear resistant, low-lint outer casing

Ideal for cleanroom use

Extra-Low Lint Pads have a unique outer casing that still passes liquids

FEATURES & BENEFITS:

- These kits are designed to be compact; taking up less space on shelves & counter tops where space is a premium.
- Kits available include a universal mini spill kit, mini acid/base/alkaline spill kit & a wall cabinet kit
- Mini acid/base alkaline spill kit takes up very little space on shelves or table tops. Box has removable perforation to hold contents but keep them visible before use.
- Lightweight, hi-capacity particulate in universal mini spill kit instantly soaks up liquids, which reduces cleanup time & limits liability exposure. Minimizes slip / fall injuries.
- Wall cabinet kits keep contents safe & secure & use an easy-carry handle. Provides all the supplies necessary to safely clean up oils, acids, caustics, solvents, & toxic spills.

FEATURES & BENEFITS:

- All acid/base kits use KOLOR-SAFE® neutralizers – thus eliminating guess work thanks to color changing process
- Acid/base combo kits contain neutralizers for acids & bases giving a complete kit for any kind of spill
- Battery acid spill kits are perfect for garages, forklift storage areas, battery storage areas etc. Also effective for clean-up of dry cell batteries
- Grab & go acid & base/alkaline neutralizer bucket spill kit #27000 keeps you prepared for small spills of either acids or base/alkalines.
- SEE ACID & BASE/ALKALINE NEUTRALIZATION REFERENCE CHARTS ON PAGE 15

FEATURES & BENEFITS:

MERCURY INDICATOR POWDER

- Identifies the presence of mercury in suspected contaminated areas simply sprinkle over an area & let sit undisturbed for 24 hours.
- If a pink to reddish brown or black area appears – there is mercury present (250 grams of mercury indicator powder will cover 0.1 To 0.15 M2)

VAPOR SUPPRESSOR

- "Adsorbs" mercury (hg) vapors which are difficult to remove using other absorbents including activated carbon
- Can achieve an absorption capacity of 20 gr of hg/100g of carbon

AMALGAMATION POWDER

- Used to convert elemental mercury into an amalgam which stops dangerous mercury vapors from being emitted (can absorb up to 15 gr of hg/100 gr of carbon)

Mercury Products Should be used by trained professionals only

FEATURES & BENEFITS:

HANDS-IN-BAG®

- Gives user a portable atmospheric chamber when working with dangerous liquids
- Easy to use – simply inflate & use
- Made from high-clarity polyethylene film which can be sealed, purged & inflated - provides a convenient, portable glove box alternative.
- Available in multiple sizes including versions where two or four hands can be used individually. Packed including sealing tape. Built-in gloves provide a sealed atmosphere environment for handling unknown items.

FORMALDEHYDE SPILL CONTROL

- The resulting solid is still hazardous & must be disposed of in adherence to all local, state & federal regulations.

Spilfyter® Hands-in-Bag® #690321

Spilfyter® Hands-in-Bag® comes in an envelope printed with instructions

FEATURES & BENEFITS:

- Premium material with high absorbency properties & latex free!
- Skid-resistant backing for a safe work environment. Leak-proof poly-backing traps liquids & protects floors.
- Durable spunbond, lint-free cover sheet with dimple bonding for increased strength.
- Light & heavy-weight absorbencies that allow for low & high volume fluid applications.
- Pads utilized 3-ply construction that results in a low lint, high strength & non-slip product that keeps liquids from reaching floors in areas where fluid transfer may occur.
- Effective & durable: keep your operating room neat & clean during less messy procedures.. Great for high-traffic areas, such as around scrub sinks.
- Low profile & comfortable: lays flat to the floor & does not bunch up. Pads act as a cushion to reduce strain.

Poly-Backing is tacky; creating a non-slip surface

Top Layer of Spunbond is tear resistant; but still allows liquids to pass through

Poly-Backed Products are perfect for hospital operating rooms

FEATURES & BENEFITS:

SOAKERS:

- Multi-purpose soakers are ideal for use in laboratories when placing beakers on desks. Designed to clean up minor spills.
- Premium multi-purpose soakers use absorbent tissue layers with a waterproof, skid-resistant & chemical-resistant poly backing that makes spill clean-up easy.

CELLULOSE-BASED SORBENTS:

- Available both in roll format as well as pad format to suit your application. Heavy as well as light duty versions available for greater versatility
- Place cellulose-based sorbents under & around hospital gurneys, use to line shelves, & for clean-up applications.
- Latex free.
